EDUCATION

Vivekananda Institute of Professional Studies (VIPS) Delhi

B.Tech - Artificial Intelligence & Data Science|2024 – Present

RPS International School Gurugram, India

Senior Secondary (Class XII) – CBSE Board Year: 2024

Secondary Education (Class X) – CBSE Board Year: 2022

EXPERIENCE

Embedded Systems Developer 2024 – Present

Kenet Technologies Delhi, India

- Built Kenet Technologies from the ground up, leading all technical decisions from concept to product deployment.
- Developed NoteNetra, an ESP32-based smart currency detection system featuring a real-time cloud dashboard for visually impaired users.
- Designed VisionPay, a camera-based UPI payment system with voice assistance enabling accessible QRcode payments.

PROJECTS

Hotel Management System (Java/Python + MySQL5) 2024 – Present

- Developed a Hotel Management System to manage room bookings, customer records, check-in/check-out, and billing operations.
- Implemented room availability tracking, customer registration, and automated invoice generation.
- Used database integration for secure storage and retrieval of guest and booking information.

VisionPay – Accessible UPI Payment System | React.js, Firebase, Computer Vision 2024 – Present

- Built a camera-based QR code payment interface enabling visually impaired users to make UPI transactions independently.
- Implemented voice assistance features to guide users through each step of the payment process.
- Integrated Firebase for real-time database and authentication, ensuring secure and fast transactions.

Student Performance Analyzer (Python, Pandas, Matplotlib) 2025

- Developed a Python-based application to analyze student academic performance using subject-wise marks and attendance.
- Calculated overall percentage, grade distribution, class averages, and top-performing students.
- Generated visual reports and charts using Matplotlib for better performance insights.

ACHIEVEMENTS

- Secured 1st Place in a 3D Designing Competition, demonstrating creativity, technical design skills, and proficiency in 3D modeling.
- Participated in various technical and innovation-based competitions focused on engineering and technology.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, HTML/CSS

Frameworks & Libraries: React.js, Firebase, FastAPI

Hardware & IoT: ESP32, Arduino, Embedded Systems, Sensor Integration

Cloud & Databases: Firebase Real-Time Database, Cloud Integration, REST APIs

Tools: Git, VS Code, Arduino IDE

Domains: Artificial Intelligence, Machine Learning, IoT, Fintech, Smart Automation
